hosky, Coux.—Has suffered from the pressure

wished themselves out again.

Eogs.—Looked promising yesterday, but opened had this morning.

ger made a rapid transfer of the funds and withdrew immediately.

MATRIMONIAL.— Market steady. Liberal offers difficult to obtain; therefore, acquain-tances are at a large discount. Kisses in great demand and have met with fair returns. demand and have met with fair returns. Maternal Frowns—neglected and, in consequence, time-bargains are easier of settlement. Heavy Purses are wanted, but stocks with small capital are overlooked. In Hands—the demand has been flat. Sly Squeezes—unusually brisk. Hearts to be had for love went off unsteadily; those for money are a drug. Bright Eyes—looked up occasionally, but seen fell again. Yes's—in plenty, but no takers. Blushes are very scaree; none on the market for a long time. Jealousy has risen considerably. Free-and-castes have advanced to a high figure and driven Genuine Modesty out of the market. Other stocks are quiet, excepting Scandal, which is rather on the advance.

Unfortunate for Englishmen if True.

—A contemporary says: The English workman's wife is, in time cases out of ten, a woman of very imperfect or of no education, who knows next to nothing of domestic economy. Her principal idea of cooking is to take a joint to the neighboring baker, and have it baked in his oven without trouble to herself. She does not know how to make soup, broths, stews, or savory dishes, or how to convert a pound of meat, by the aid of vegetables and condiments, into a dish satisfying alike to the palates and stomachs of three or four people. The Scottish women of the same class are much better instructed, and can do as much with half a crown in the sustenance of their families, without stinting them, as an Englishwoman can with four or five shillings. UNFORTUNATE FOR ENGLISHMEN IF TRUE

A widow advertised in Chicago, asking "every Christian in the city" to send her ten cents, as the amount would not oppress them, and the collection would benefit her greatly. For a wonder, the class called upon did all contribute as requested, and the widow realized twenty cents!

GUIDJE IND SCHENTIFIC

WHEAT.—The inquiry has been very hisky.

An ingenious method of performing needlework, styled pantagraphic embroiding of leather, the reapers, however, are ready.

Cand.—In suffered from the pressure of leather, the reapers, however, are ready.

Cand.—The inquiry has been very dieded by the frost there can be no doubt.

SELF RELIANCE -There is nothing more SELF RELIANCE —There is nothing more liable to result in the successful career of a young man than confident self-reliance. It is astonishing how much more a youth will accomplish who relies upon himself, than one who depends upon others for assistance. Having first ascertained the direction in, and the means by which his object is to be reached, let him put his whole energies to work, and with unflaging industry press forward. The young man who, instead of rising at 5, sleeps till 7 or 8, and who spends his evenings on the corners, or in the companionship of those who are wanting in laubable ambition, rarely ever wins a position of honor or achieves a reputation above that enjoyed by the common masses.

that enjoyed by the common masses. The bed of the Mississippi river seems to be filling up at a rate which threatens in the course of time to seriously affect navigation during the dry season. This year at St. Louis, while the surface of the water has been four feet and one inch above the lowest stage of water attained by the river in 1843, there was at the same time only about five inches difference in the depth of the channel between these years, showing that the bottom of the river must be three feet and four inches higher than it was in 1863. So in 1856 the bed of the river was found to be two feet and three inches higher than it was ten years previous.

The reports of the Board of Pharmacy of New York city shows that out of two hundred and lifty druggists, and one hundred and ninety clerks examined by the commissioners, sixty druggists and eighty-one clerks failed to give sufficient proof of the qualifications necessary, and were rejected. The majority of the leading druggists in the city have been examined, and the result shows that a 'arge number of both druggists and clerks could not read the Latin prescriptions.

after comes the convival entertainments; and the same hands again present you with the cup; and you drink again. Temptations follow at frequent intervals, and on each succeeding occasion you yield more easily than at the previous one. It does not make you a drunkard, but it weakens your power of standing on your considered and manly

Swert Pors.—It is beyond a doubt that cleanliness has much to do with the flavor of pork. The flithy state in which many fatpork. The flithy state in which many fattening hogs are kept has a tendency not only to give a rank taste to the meat, but to render it positively unwholesome. A very common mode of penning hogs at this season is in a rail pen, without protection from the weather. The consequence is that such pers are not fit to keep a living animal in; wet and flithy, cold and uncomfortable as they are, hogs will not take on fat, and a great proportion of the food is wasted while they are kept in them, while the flith, a considerable amount of which the hogs will consume, must be detrimental to their health, and to the health of those who eat their flesh. It is not only safer but more economical to give fattening animals good shelter and dry beds and litter, and keep them quite clean. The labor will be well repaid.

Few men know of how much they are espable until they have first thoroughly tested their abilities. The amount of labor, literary or mechanical, which a person in vigorous health can perform, is almost without limit it a systematic method is adopted, and the proper spirit incited to the effort. An hour of each evening spent with some good author, or in the study of some branch of useful science, will in the course of a few years give to a young man who thus devotes this small portion of his time an amount of information, literary or scientific, which can not fail to fit him for positions to which he could never properly aspire without this attention to study.—Exchange.

Squash, or Pumpkin Pir.—One cup of stewed squash or pumpkin, one tablespoonful of corn starch, dissolved in milk, saioratus or soda, the size of a pea, half spoonful extract of lemon, one quart of milk, a little sait, one egg; sweeten to taste.

HOUSEHOLD DEPARTMENT.

GREEN TOMATO PIGELE.—One peck toma-toes, one dozen onlons sliced, lay in salt one night. Then pour off the water, and add-one ounce each of pepper, alispice and cloves, one-fourth pound mustard seed, one-pound sugar; cover with vinegar and boil till tender.

7.125 56 1.55 9.00 185 00 185 otton low middling. Mame at Inst! "For five years" writes a gen-tleman at Harrisburgh, Pa., "I was on a wild-goose chase after remedies for dyspepsia. I have taken first and last enough "infalible cures" to float a jolly boat, and the more I swallowed the laster I got no better. Luckity, or rather provi-dentially, it came into my head to try Dn. Walk-er's Vegerrants Visneau Birtans. This was about five months ago. In less than six weeks not a twinge remained to remind me of the complaint, i am perfectly well, and have only one regret-that I did not discover the true specific sconer."

The maxim that the voice of the people is th to doubt, but the testimony of honest and enlight-ened witnesses extending through a series of years, and all to the same purport, is worthy of credence, admits of no question. Upon such testimony the reputation of Hostetter's Stomach Bitters as an reputation of Hostetter's Stomach Bitters as an antidote and cure for many allments is based. During the twenty years that it has been before the world, innumerable preparations intended to compete with it, have gone up like rockets, and come down the extinguisned sticks. Meanwhile the progress of that incomparable tonic has been swift and steady—always upward and onward like the eagle's flight. Its introduction produced a revolution in therspeutics, and it proved to be one of those salutary revolutions that can not go backwards. To-day Hostetter's litters is one of the most popular remedies in christendom, and commands a larger sale than any other medicinal premost popular remedies in christendom, and com mands a larger sale than any other medicinal pre-paration, domestic or imported, on this side of the Atlantic. As a cure for dyspepsis, billous disor-ders, nervous affections, general debility, and as a preventive of epidemic fevers, it takes prece-dence of every other remedy. This fact should teach the ambitions country delers who greater
